

1. Go to <http://dev.mysql.com/downloads/mysql/>
2. Click the Download button under Recommended Download

**MySQL Community Server 5.7.10**

Select Platform:  
Microsoft Windows ▼

**Recommended Download:**

**MySQL Installer 5.7**  
for Windows

**All MySQL Products. For All Windows Platforms.  
In One Package.**

Starting with MySQL 5.6 the MySQL Installer package replaces the server-only MSI packages.

**Windows (x86, 32-bit), MySQL Installer MSI**

**Download**

3. Click the first download Button

**Generally Available (GA) Releases**

**MySQL Installer 5.7.10**

Select Platform: Microsoft Windows ▼ [Looking for previous GA versions?](#)

Windows (x86, 32-bit), MSI Installer <small>(mysql-installer-web-community-5.7.10.0.msi)</small>	5.7.10	1.6M	<b>Download</b> <small>MD5: 1e775c1f1b441a8ba9d4bd8ec35b2f4a   <a href="#">Signature</a></small>
Windows (x86, 32-bit), MSI Installer <small>(mysql-installer-community-5.7.10.0.msi)</small>	5.7.10	371.7M	<b>Download</b> <small>MD5: 8a3d1ae852c3d2f255ea9a732a539721   <a href="#">Signature</a></small>

4. Click “No thanks, just start my download.” at the bottom.
5. Once the .msi installer has downloaded, open it.

Note: This is the sequence of instructions that I had to follow when installing on Windows 7. The exact steps that you need to click through may vary depending on your OS version and what you already have installed on your computer. If you are unsure about a step, please ask for help.

6. Check "I accept the license terms" and click Next.
7. Select "Developer Default" and click Next.
8. Click "Next"; if you get a warning that one or more product requirements are not satisfied, it is ok as we will not be using all the features. Click "Yes" on this warning.
9. Click "Execute" and wait for the products to be downloaded and installed.
10. Once all items are complete, click "Next".
11. Click "Next"
12. On the Type and Networking page, leave all options as-is and click "Next".
13. Make up a password for the root account and type it in to both boxes. Then click "Next".
14. On the Windows Service page, keep all options as-is (or uncheck the box to start MySQL at startup if desired) and click "Next".
15. Click "Execute" and wait. Once configuration has finished, click "Next".
16. Click "Next".
17. Under "User" enter "root"; in the password box, enter the password you made up in the previous steps. Once entered, click the "Check" button. Then click "Next".
18. Click "Execute". Once complete, click "Finish".
19. Click "Next".
20. Click "Finish".

To open from the start menu, click Start Menu>All Programs>MySQL>MySQL Server 5.7>The MySQL Command Line Shell

When prompted, enter the root password you created during setup.
